Physical Testing

This test certificate and the results contained relate only to the sample tested and must be considered in conjunction with the full test report, which documents the scope and limitations of the testing conducted. This report alone cannot prove that a material is generally fit for any intended purpose. Unless a test is specifically stated to be included within the scope of our accreditation to BS EN ISO/IEC 17025:2005 it should be assumed not to be so. Note that any opinions or interpretations given are outside the scope of our UKAS accreditation.
