

Silicone Castellated Hose

Our castellated silicone hose is constructed using an integral silicone liner, three-ply polyester reinforced silicone and a 1.2mm thick galvanised steel wire helix running inside the wall of the hose. It offers the advantage of extreme flexibility in comparison to conventional cured hoses, making it suitable for coolant and air applications.

Approvals

SAE J20R4 Class A

Operating temperature range: -70°C to 170°C
