Polymax PTFE 60 ShD

Polytetrafluoroethylene / Teflon

PTFE is a highly resilient O-ring material unaffected by virtually all known acids, alkalis and solvents. It is tough, abrasion resistant and capable of withstanding temperatures between -200°C to +250°C. It also possesses outstanding weather, ozone and electrical resistance. For this reason, it is the O-ring of choice for use in aerospace, food, pharmaceuticals and telecommunications industries. PTFE O-rings could be a more economical alternative to FFKM materials, but they are not easily compressed and have little memory to be able to return to their original form. This can be a disadvantage if under permanent strain and may not create the best lasting seal.

Colour: White

Operating temperature range: -70°C to 250°C

| Physical Property | Test Method | Units | Typical Values |
|-------------------|-------------|---------|----------------|
| Hardness | GB/T2411 | Shore D | 58 |
| Tensile Strength | GB/T1040 | MPa | 29.5 |
| Elongation | GB/T1040 | % | 310 |
| Specific Gravity | GB1033 | g/cm3 | 2.17 ±0.03 |
